

27 Immediate Last Recording Play

This update is needed to give users more information about the availability of “Immediately” playing and emailing the last recording. It appears that short recordings, are almost immediately available, but longer recordings sometimes take a long time to be available. By a long time, I mean, more that a few seconds.

This update does two things to make the 27 and 28 buttons easier to use.

First, add another location for those buttons, that is directly on the login page. As a result, you don't have to look for the 27 28 page. Now we will have the 27 and 28 buttons showing in two places. This shows on Page 2 (Login Page with change)

Second, we add variable color to the 27 and 28 buttons. Page 3 doesn't have changes, except that it shows the 27 and 28 Buttons.

Here's the Colors showing the current status.

Red - Account number Password not satisfied

Blue - Ready to Play and be Emailed

Green - Recording Available but being copied.

When copy is complete, the color will turn Blue.

Purple - Color for some other problem.
